

Motion is embarking on an exciting new initiative for the Automation team and the name of this team is **Motion Automation Intelligence.**

MotionAi brings together the leading high-tech automation solution providers for industrial automation across the United States. The expertise found in this group includes emerging automation technologies with focused disciplines in robotics, motion control, machine vision, digital Networking/IIoT, industrial framing, pneumatics and custom mechatronic systems.

OPPORTUNITY

The demand for higher equipment utilization rates and faster changeovers in manufacturing has opened the opportunity for an increasingly rapid paced growth in automation. Additionally, with labor supply contraction, the gaps in skilled labor, and a rise in reshoring, US manufacturing has created an even stronger interest in investing in automation. MotionAi is positioned to seize these opportunities with elite-level expertise providing customers with custom automation and robotic solutions.

STRATEGY

While MotionAi offers the critical link between suppliers and customers, our engineering expertise and vast distribution network serve to implement automation solutions for a diverse set of end markets and applications. Many industries, including semiconductor, pharmaceutical, medical, logistics, automotive, aerospace and many more benefit from MotionAi applying best-in-class products and services with our engineered systems.

DIVISIONS

The new Motion Automation Intelligence business currently comprises 7 divisions with multiple locations throughout the United States.
