

Miller Research Potato Pest Management Seminar

Monday, December 16 or Tuesday, December 17

426 East 200 North; Rupert, ID

Miller Research LLC will be holding its annual potato pest management research meeting on Monday, December 16 and Tuesday, December 17. The same program will be repeated both days and seating in each session is limited to 45. The meetings will be held at the Miller Research facility located near Acequia, ID (426 E 200 N).

The cost to attend is \$10 and lunch will be provided.

Please forward this notice to any interested parties.

Agenda:

9:00-9:30	Problems at Planting Seed treatments for reducing Fusarium seed piece decay and silver scurf Seed treatments and in-furrow applications for managing Rhizoctonia
9:30-10:30	Leaf spots, blights, and vine rots – Keeping the leaves healthy Integrated fungicide programs for early blight/white mold/late blight
10:30-10:45	Break
10:45-11:45	Getting healthy potatoes to storage Control options for pink rot, Pythium leak, common scab, and powdery scab
11:45-12:15	Odds and Ends Update on the potato psyllid trapping program and insecticide trial Use of Vydate as an alternative to fumigation for potato early dying

Please RSVP as to which session you would like to attend to Jeff Miller at 208-531-5124 or by email at: jeff@millerresearch.com so that we can get an accurate count for lunch and room preparation purposes.

Presentations and discussions will focus on fungicide use rates, application timing and methods, and strategies for avoiding the development of resistance in pest populations. Research discussed here was sponsored or provided by the Idaho Potato Commission, Agro-Chemical Companies, and University Resources.

A total of 3 ISDA pesticide recertification credits have been requested and 3 CCA credits (Integrated Pest Management) have been awarded.

A copy of the presentations will be posted on our website (www.millerresearch.com) after the meeting is over.
