

RIMON[®] 0.83EC

Insecticide

PRODUCT INFORMATION BULLETIN

Supplemental Recommendation

For the Use of Rimon 0.83EC – EPA Reg. No. 66222-35-400
On Potatoes

FIFRA 2(ee) recommendation for use and distribution in the states of California, Colorado, Idaho, Nebraska, Nevada, New Mexico, Oklahoma, Oregon, South Dakota, Washington

Under FIFRA 2(ee) Rimon 0.83EC is recommended for use on potatoes for potato psyllid control

Target Pest	Rates (Fl. Ozs./A)	Application Instructions
Potato psyllid	12	Applications may be made from prior to egg lay through the second instar. Use sufficient spray volume to provide thorough coverage, especially when foliage canopy is tall or dense. Only two applications may be made as needed to protect new foliage growth from potato psyllid, but the applications must be made no less than 7 days apart.

This recommendation is made as permitted under FIFRA section 2(ee) and has not been submitted to or approved by the EPA. Observe the warranty statements and conditions specified on the label for Rimon 0.83EC. It is important to read and observe all restrictions, precautions and other information appearing on the label.
