## INTRODUCING A POWERFUL NEW FUNGICIDE UNLIKE ANY OTHER

Introducing Howler™ fungicide from AgBiome Innovations™, a revolutionary fungicide that harnesses the power of the plant microbiome to create an efficacious fungicide with multiple modes of action that provide preventive, long-lasting activity on a broad spectrum of soilborne and foliar diseases. Howler can be used effectively at every phase of production: greenhouse, planting, early plants, maturing plants, harvest and post-harvest.

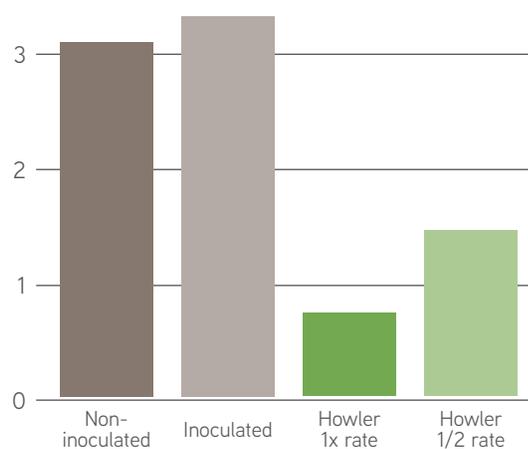

### DISEASES CONTROLLED

- Botrytis
- Colletotrichum
- Phytophthora
- Pythium
- Rhizoctonia
- and more

### A REVOLUTIONARY FUNGICIDE

- Preventive, long-lasting activity
- Multiple modes of action
- OMRI listed
- Minimal pre-harvest interval
- Minimal re-entry interval
- No special handling/storage required

### SPOILAGE SEVERITY

Howler results on post-harvest strawberries inoculated with Botrytis

## BROAD-SPECTRUM DISEASE CONTROL

Howler is highly effective against a broad range of fungal diseases on a wide range of high-value crops.

The chart below highlights just some of the key crops and diseases.

## HARNESSING THE POWER OF THE MICROBIOME

The science behind this revolutionary new technology is based in the plant microbiome and a proprietary platform developed by the researchers at AgBiome™ to identify and capture isolated microbials that can fight disease and suppress insect pests. Through the Genesis™ discovery platform, AgBiome™ has managed to compile the world's largest collection of fully sequenced microbes and has identified highly effective biologicals with multiple modes of action that can help solve some of agriculture's biggest problems.
