

MALOU

DESCRIPTION:

Round shaped tubers with a bright yellow skin and medium yellow flesh.

TUBER CHARACTERISTICS:

Has fairly smooth skin, shallow eyes with tubers very uniform in size. Has a creamy texture when cooked.

STRENGTHS:

High yields with normal inputs, early maturing with no secondary growth issue in hot climates.

DISEASE RESISTANCE:

Has resistance to PVY, Black Leg, Tuber Blight and Rhizoctonia.

MATURITY:

Early maturity.

YIELD:

High yields with uniform size tubers.

CULINARY QUALITY:

Roasting, Baking, Frying & Boiling.

STORAGE:

Medium too late.

FERTILITY:

Should be slightly above common yellow.

WEAKNESSES:

Sensitive to Metribuzin.

INNOVATION

SunRain Potato Varieties offers an isolated, early and limited generation seed program.

We always look for key processes for better, clean, uniform and cost effective seed. SunRain can tailor early generation and limited generation seed to both seed and commercial entities. Come to SunRain for new thoughts, new soil, excellent growers and state-of-the-art facilities.

UNIQUE & PROPRIETARY VARIETIES
